Career Objective

Motivated AI Engineer with robust expertise in machine learning, computer vision, and multi-agent orchestration. Passionate about driving innovation through cutting-edge AI solutions in NLP, generative media, and intelligent automation. Adept at leading teams and delivering scalable, impactful products that solve real-world challenges.

Professional Experience

AI Developer

BETOPIA (SOFTVENCE - SISTER CONCERN)

Dhaka, Bangladesh

January 2025 – Present

- **Biovue:** Developed an AI-powered fitness recommendation system that analyzes users' daily activities and provides personalized food and Exercise suggestions.
- **InPrep-AI:** Directed development of AI-powered mock interview platform with question generation, scoring, feedback, and candidate tracking.
- **Multi-Agent Chatbot:** Oversaw integration of EachLabs video/image generation, TTS, and editing tools into scalable FastAPI multi-agent pipelines.
- **AI Ad Generation System:** Managed shot-based AI ad video pipeline using GPT-4, MusicGen, Stable Diffusion, and Pydub for end-to-end ad creation.
- **NFL Player Predictor:** Led feature engineering and modeling combining Goalserve stats, injury data, and fantasy scoring to predict weekly top NFL players.
- **Viral Clip Detection:** Developed hybrid video segmentation and viral shot detection algorithms optimizing social media engagement.
- **Car Body Wrap AI:** Computer Vision Engineer, Pipeline for car segmentation (U-Net/SegFormer/SAM) + Stable Diffusion wrap generation.

Skills

- **Programming Languages:**
Python, SQL, C, JavaScript
- **ML Frameworks:**
Scikit-learn, XGBoost, LightGBM, TensorFlow, Keras, FastMCP
- **Deep Learning:**
CNNs, RNNs, Transformers, U-Net, Stable Diffusion
- **NLP & Embeddings:**
Hugging Face, OpenAI API, NLTK, spaCy, SentenceTransformers
- **Computer Vision:**
OpenCV, YOLO, MediaPipe, SAM, FFmpeg
- **Vector Search:**
FAISS, Pinecone, Weaviate (basic)
- **AI Integration Platforms:**
FastMCP, LangChain, LlamaIndex (basic)
- **Data Engineering:**
Pandas, NumPy, DVC, FastAPI, Streamlit, Airflow (basic)
- **Visualization:**
Power BI, Plotly, Seaborn, Matplotlib
- **Cloud & DevOps:**
Render, Vercel, Netlify, GitHub Actions, Azure (basic)
- **Databases:**
PostgreSQL, MySQL, MongoDB, Vector DBs
- **Tooling:**
Git, Docker, Postman, Jupyter, Colab, VS Code

Personal Projects

- **MCP Platform** — Multi-agent orchestration system enabling seamless integration of AI tools and APIs.
- **Image Captioning Model** — Deep learning model that generates human-like descriptions from visual input.
- **Text-to-Image Generator** — Converts natural language prompts into high-quality visuals using Stable Diffusion.
- **Heart Disease Prediction API** — Machine learning model deployed via FastAPI for early medical diagnostics.
- **Netflix Data Analysis** — Exploratory data analysis uncovering viewer behavior and genre popularity trends.
- **Power BI Dashboards** — Designed interactive business intelligence dashboards for KPI and sales reporting.
- **Student NLP Chatbot** — Multilingual educational assistant using OpenAI APIs, deployed on Render.
- **sipd.coffee** — A flutter based coffee shop rating App for coffee lovers.
- **Smart Calender Ai** — A flutter based reminder App using AI feature.

Education

BSc in Gopalganj Science and Technology University
CSE Gopalganj, Bangladesh

2019 – 2024

Training & Certifications

EDGE-BSMRSTUCSE — Digital Skills for Students
Dhaka, Bangladesh

May – Sep 2024

- Data Analysis with Python: EDA, hypothesis testing, ML pipelines

Skill Development for Mobile Game Application — ICT Division
Dhaka, Bangladesh

August – December 2022

- Mastered Flutter Dart to develop cross-platform mobile apps with responsive UI, state management, API integration, and Firebase
